Gameplay Programmer specializing in Unreal Engine 5, C++, Blueprint, and Gameplay Ability System (GAS). Professional experience developing gameplay features, implementing abilities, debugging complex systems, and collaborating within production game development environments.

Contributed to commercial projects using Unreal Engine, UEFN, Verse, and proprietary game technology. Passionate about gameplay programming, game architecture, and building engaging player experiences through clean, maintainable code.

TECHNICAL SKILLS

Gameplay Programmer with professional experience developing features in Unreal Engine 5 using C++ and Blueprint.

Experienced with GAS, gameplay mechanics implementation, bug fixing, debugging, AI behaviors, UI systems, and gameplay feature development.

Familiar with UEFN and Verse, object-oriented programming, data structures, algorithms, and Agile development workflows.

Experienced with Git, Visual Studio, Rider, and IntelliJ IDEA, with a strong interest in gameplay architecture, optimization, and scalable game systems.

EXPERIENCE

Gameplay Programmer (Part-Time)

AlpaK' Games | Recife, Pernambuco, Brazil | Remote | Jan 2026 – Present

Contribute to the development of QuilomboZ: Palmares, an Unreal Engine 5 game, using C++ and Blueprint. Develop and maintain gameplay features, investigate and resolve gameplay-related bugs, and improve existing mechanics based on design feedback. Collaborate with the game designer through weekly planning meetings to discuss implementation approaches, prioritize tasks, and support ongoing development. Contribute to the continuous improvement of gameplay systems and code architecture within an existing production codebase.

Game Programming Intern

Gamebreaking Studios | California, USA | Remote | Jan 2026 – Jun 2026

Contributed to the implementation of Steam Achievements using ActionScript 3 and the Steamworks SDK within a proprietary game engine. Worked on analyzing existing gameplay systems, identifying achievement trigger points, implementing unlock logic, and validating achievement functionality across different gameplay scenarios. This experience provided valuable exposure to a professional game development pipeline and to working within an established production codebase.

Unreal Engine Developer (Freelance)

Black Hand (on Steam) | California, USA | Remote | Nov 2025 – Dec 2025

Worked on gameplay and system improvements for an Unreal Engine project, The Dark West, using C++ and Blueprint. Responsibilities included debugging and fixing gameplay, UI, AI, audio, and GAS issues, as well as developing a new gameplay ability prototype. Collaborated closely with the development team through regular meetings, discussions, and feature reviews to support project goals.

Unreal Engine Developer

Gixer Entertainment | São Paulo, Brazil | Remote | Aug 2025 – Sep 2025

Contributed to the development of Changer Seven, working with Unreal Engine, C++, Blueprint, and GAS. Developed gameplay features, implemented abilities, fixed bugs, and extended existing systems while navigating a large production codebase. Collaborated with senior developers and multidisciplinary teams, gaining valuable experience working within a

professional game production environment and adapting solutions to evolving project requirements.

Game Developer

Level8 | Rio Grande do Sul, Brazil | Remote |
Jan 2025 – Jun 2025

Developed gameplay experiences using Unreal Editor for Fortnite (UEFN) and Verse, translating design concepts into interactive gameplay features and systems. Collaborated with designers and developers to create engaging player experiences while improving gameplay flow and functionality. This role strengthened problem-solving skills and the ability to quickly learn and apply new tools and technologies within a production setting.

Computer Lab Assistant

Seneca Polytechnic |Toronto, Canada | On-site |
Sep 2023 – Dec 2023

Supported students enrolled in the Introduction to Programming in C course by assisting with programming exercises, workshops, and classroom projects. Helped students understand fundamental programming concepts and problem-solving techniques while maintaining a productive learning environment within the computer laboratory.

EDUCATION

Computer Programming Diploma with Honors

Seneca Polytechnic
2022 – 2023
Toronto, Canada

LANGUAGES

Fluent English

Lived and studied in the USA from 2014 to 2015, then in Canada from 2021 to 2023. Worked remotely on international projects for U.S studios.

Native Portuguese
